

COVID-19 Vaccine and Infusion Code Fee Schedule

The Centers for Medicare and Medicaid Services (CMS) have announced new Healthcare Common Procedure Coding System (HCPCS) codes for healthcare providers to use when treating patients for the novel coronavirus (COVID-19). Additionally, The American Medical Association (AMA) has announced new vaccine-specific Current Procedural Terminology (CPT®) codes to report immunizations for the novel coronavirus (SARS-CoV-2). In response, the Medicaid fee-for-service (FFS) program is reimbursing for these codes at 100% of the Medicare reimbursement rate. The following fee schedule is a summary of the codes, their descriptions, their effective dates, and the FFS reimbursement rate.

If you have any questions about the contents of this fee schedule, please contact Christa Smith, Health Policy Analyst, christa.smith@maryland.gov.

For questions related to MCOs and Self-Referred Services, please contact Pam Williams, HealthChoice Administrator, pam.williams@maryland.gov.

COVID-19 Vaccine and Infusion Codes Fee Schedule

Vaccination products will be made available to providers at no cost by the federal government for the foreseeable future; therefore, only the cost of administration will be reimbursed. FFS Medicaid intends to reimburse for vaccine administration in alignment with the Medicare rate.

Vaccine Products			
CPT Code	Description	Effective Date	FFS Rate
91300	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 30 mcg/0.3mL dosage, diluent reconstituted, for intramuscular use	12/11/20	\$0.00
91301	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 100 mcg/0.5mL dosage, for intramuscular use	N/A	\$0.00
Vaccine Administration			
CPT Code	Description	Effective Date	FFS Rate
0001A	Immunization administration by intramuscular injection of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 30 mcg/0.3mL dosage, diluent reconstituted; first dose	12/11/20	\$16.94
0002A	Immunization administration by intramuscular injection of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 30 mcg/0.3mL dosage, diluent reconstituted; second dose	12/11/20	\$28.39
0011A	Immunization administration by intramuscular injection of Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 100 mcg/0.5mL dosage; first dose	N/A	\$16.94

0012A	Immunization administration by intramuscular injection of Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 100 mcg/0.5mL dosage; second dose	N/A	\$28.39

COVID-19 Infusion Therapy

On November 9, 2020, the U.S. Food and Drug Administration issued an Emergency Use Authorization (EUA) for the investigational monoclonal antibody therapy, bamlanivimab, for the treatment of mild-to-moderate COVID-19 in adults and pediatric patients with positive COVID-19 test results who are at high risk for progressing to severe COVID-19 and/or hospitalization.

Bamlanivimab will be made available to providers at no cost by the federal government for the foreseeable future; therefore, only the cost of administration will be reimbursed. The Department intends to set the FFS reimbursement rate at the same rate as Medicare.

Bamlanivimab may only be administered in settings in which health care providers have immediate access to medications to treat a severe infusion reaction, such as anaphylaxis, and the ability to activate the emergency medical system (EMS), as necessary. Additional information regarding limitations for authorized use can be found in the Centers for Medicare and Medicaid Services (CMS) [guidance](#) and the [fact sheet issued by the manufacturer](#).

Monoclonal Antibodies and Administration			
HCPCS Code	Description	Effective Date	FFS Rate
Q0239	Long descriptor: Injection, bamlanivimab-xxxx, 700 mg Short descriptor: bamlanivimab-xxxx	11/10/20	\$0.00
M0239	Long Descriptor: intravenous infusion, bamlanivimab-xxxx, includes infusion and post administration monitoring Short Descriptor: bamlanivimab-xxxx infusion	11/10/20	\$309.60
Q0243	Injection, casirivimab and imdevimab, 2400 mg	11/21/20	\$0.00
M0243	intravenous infusion, casirivimab and imdevimab includes infusion and post administration monitoring	11/21/20	\$309.60
