## Maryland Medicaid Long-Term Services and Supports Overview

*The Maryland Long-Term Services and Supports Chart Book, Volume 2, The Autism Waiver* is the second chart book in a series of two that explores service utilization and expenditures for Medicaid-funded long-term services and supports in Maryland. The first chart book in the series, *Medicaid Long -Term Services and Supports in Maryland, Volume 1*, explores service utilization and expenditures for Maryland Medicaid's Living at Home Waiver, Older Adults Waiver, and Medical Day Care Waiver, as well as Maryland State Plan personal care services and Medicaid nursing facility utilization and expenditures.

This chart book provides information about Maryland Medicaid participants who received services through the Autism Waiver in fiscal year (FY) 2008 through FY 2011. The Autism Waiver, which became effective on July 1, 2001, provides community-based services to individuals from the age of 1 year through the end of the school year in which the individuals turn 21 years old. The waiver enables individuals with Autism Spectrum Disorder and who meet an institutional level of care (Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-ID)) to be supported in their own homes, community-based settings, or school-based settings. The waiver is authorized under Section 1915(c) of the Social Security Act and approved by the federal Centers for Medicare and Medicaid Services. It is operated by the Maryland State Department of Education and overseen by Maryland's Medicaid Program.

Services covered under the waiver include adult life planning, family training, intensive individual support, and habilitation. Waiver participants receive full Medicaid benefits and are entitled to receive other services under the Maryland Medicaid State Plan.

## Overview continued

In FY 2011, the Autism Waiver served a total of 900 participants, with Medicaid expenditures totaling \$42 million. Due to the high demand for Autism Waiver services and a defined number of available waiver slots (900 in FY 2011), the Autism Waiver is currently not accepting applications. Marylanders wishing to receive Autism Waiver services must place their names on the Autism Waiver Registry of Interested Families and are asked to apply as openings arise and their names approach the top of the list.

## Key Findings

This chart book summarizes demographic, service utilization, and expenditure data for the Autism Waiver for FYs 2008 through 2011. The data are presented through a series of figures that illustrate trends in Autism Waiver utilization with accompanying narrative text. Notable trends in the data include:

- The Autism Waiver served a total of 900 participants in FY 2011. As there is a defined number of waiver slots, the number of participants has been relatively stable since FY 2008.
- With 8 Autism Waiver participants per 10,000 residents aged 0 to 24, Howard and Fredrick Counties have the largest number of Autism Waiver participants per capita.
- Total Medicaid expenditures for Autism Waiver participants, excluding administrative costs, increased in each of the four reporting periods, reaching \$42 million in FY 2011. Over \$30 million (or 72%) of those expenditures were for the provision of waiver services; the remaining costs were for state plan services.
- Average annual total Medicaid expenditures for Autism Waiver participants were \$46,562 in FY 2011, an increase of 1.3% over the previous year.
- Intensive individual support services accounted for 62% of FY 2011 Medicaid expenditures for Autism waiver services.
- The most widely used FY 2011 Autism Waiver services were intensive individual support services (94% of participants), respite care services (86%), and family training (82%).

## Chart Book Organization

The data in this chart book are presented in two sections.

- **Waiver Participants:** This section includes data on the number of Autism Waiver participants with breakdowns by age, race, gender, county of residence, average length of stay, and reason for leaving the waiver. It also contains data on the settings from which individuals entered the waiver program and prior Medicaid coverage.
- **Medicaid Expenditures and Service Utilization:** This section provides data on expenditures for waiver, non-waiver, and pharmacy services used by participants in the Autism Waiver program.

## Data Sources

The information in this chart book was derived from the following data sources:

- **Maryland Department of Health and Mental Hygiene (DHMH) Medicaid Management Information System (MMIS2):** This system contains data for all individuals enrolled in Maryland Medicaid during the relevant fiscal year, including Medicaid eligibility category and fee-for-service claims. All MMIS2 data is warehoused and processed monthly by The Hilltop Institute.
- **DHMH Decision Support System (DSS):** This system provides summary reports based on MMIS2 files and functions as a data resource for figures in this chart book derived from the DSS.
- **U.S. Census Bureau:** 2011 Modified Race Data, prepared by the Maryland Department of Planning, Projections and Data Analysis, State Data Center, May 2012.

# Chapter 1: Autism Waiver Participants

**Figure 1. Unduplicated Number of Autism Waiver Participants**

In the past four years, the Autism Waiver has operated at or near the approved waiver capacity of 900 slots. There were exactly 900 participants enrolled in FY 2011.

**Figure 2. Number of Persons on the Autism Waiver Registry of Interested Families**

The number of Marylanders on the Autism Waiver Registry of Interested Families increased 1.5-fold, from 2,537 as of June 2007 to 3,799 as of June 2012. Although the number of registrants on the registry continues to increase, the rate of increase each year slowed; it was 22% from June 2007 to June 2008 and 10% from June 2011 to June 2012.

Source: DSS

**Figure 3. Autism Waiver Participants, by Age Group**

The Autism Waiver population continued to age as a result of the low turnover rate among participants. The largest percentage of waiver participants in FY 2011 were in the 11 to 15 and 16 to 21 year-old age groups. Two participants were 22 years of age.

**Figure 4. Autism Waiver Participants, by Gender**

Gender	FY 08	FY 09	FY 10	FY 11
Female	188	180	189	190
Male	713	718	706	710
<b>Total</b>	<b>901</b>	<b>898</b>	<b>895</b>	<b>900</b>

In each of the four reporting periods, male Autism Waiver participants outnumbered female participants by a 4 to 1 ratio.

Source: DSS

**Figure 5. Autism Waiver Participants, by Race, FY 2011**

In FY 2011, slightly more than half (53%) of Autism Waiver participants were White.

Source: DSS

**Figure 6. Number of Autism Waiver Participants, Per Capita, by County, FY 2011**

In FY 2011, there were 5 Autism Waiver participants per capita (for every 10,000 Marylanders aged 0 to 24). Seven Maryland counties had 5 or more Autism Waiver participants per capita. Howard and Frederick Counties had the largest number of participants per capita, at 8.

**Note:** The U.S. Census Bureau's age categories do not align with the Autism Waiver age criteria. The population per capita calculations, therefore, include persons aged 0 to 24 years.

**Sources:** DSS, U.S. Census Bureau

**Figure 7. Newly Enrolled Autism Waiver Participants, by Pre-Waiver Setting**

Pre-Waiver Setting*	FY 08	Percentage	FY 09	Percentage	FY 10	Percentage	FY 11	Percentage
<b>Chronic Hospital</b>	0	0%	1	2%	2	3%	2	3%
<b>ICF-ID</b>	1	1%	0	0%	0	0%	0	0%
<b>Other</b>	83	99%	55	98%	59	97%	70	97%
<b>Total Participants</b>	<b>84</b>	<b>100%</b>	<b>56</b>	<b>100%</b>	<b>61</b>	<b>100%</b>	<b>72</b>	<b>100%</b>

\* Pre-waiver setting refers to the setting in which the participant resided prior to enrolling in the Autism Waiver. To determine an individual’s pre-waiver setting, The Hilltop Institute examined MMIS2 claims for the three months prior to waiver enrollment to see if claims were filed for a chronic hospital, institution for mental diseases (IMD), intermediate care facility for individuals with intellectual disabilities (ICF-ID), or nursing facility (NF) stay; if so, new waiver participants were classified accordingly (however, there were no waiver participants with IMD or NF claims). Waiver participants without chronic hospital, IMD, ICF-ID, or NF claims were classified as coming from “other” settings. It cannot be said with certainty—nor can it be assumed—that individuals in the “other” category were residing in the community prior to waiver enrollment.

Source: MMIS2

In each of the reporting periods, 95% or more of the Autism Waiver participants entered the waiver from a non-institutional setting.

**Figure 8. Average Length of Stay in the Autism Waiver, in Months, for Current Autism Waiver Participants**

In FY 2011, the average length of stay for Autism Waiver participants was 63 months. The average length of stay continued to increase each year—a result of the low turnover rate.

**Note:** Participants enrolled in the Autism Waiver in each fiscal year were identified using each participant's last Medicaid Autism Waiver eligibility span. Individual participant lengths of stay were calculated from the beginning date of the participant's last Autism Waiver eligibility span to the last day of each fiscal year (June 30). The lengths of stay for persons still in the waiver on June 30 in a given year were totaled and averaged to obtain the average length of stay for all participants in the waiver on June 30 of that fiscal year.

**Source:** MMIS2

## Figure 9. Average Length of Stay for Autism Waiver Disenrollees, by Reason for Leaving, FY 2011

	No Longer Eligible	Other
<b>Number of Discharges</b>	9	2
<b>Average Months in the Waiver</b>	29.8	52.3

In FY 2011, 11 Autism Waiver participants disenrolled from the waiver. Of these individuals, most disenrolled because they were no longer waiver eligible, most likely due to aging out of the waiver.

**Note:** Autism Waiver participants leaving the waiver in each of the fiscal years were identified by examining participants' Medicaid Autism Waiver eligibility spans, which run from the beginning date of waiver eligibility to the last date of waiver eligibility. For participants with more than one Autism Waiver eligibility span, the last eligibility span was used. Autism Waiver participants whose last eligibility end date occurred during the given year are represented in this chart. Individual lengths of stay were calculated from the beginning date of the participant's last Autism Waiver eligibility span to the last day of each fiscal year (June 30). Each participant was categorized by reason for disenrollment and the lengths of stay were totaled and averaged to obtain the average length of stay by disenrollment reason. Persons in the "Other" category did not have a specific reason for disenrollment noted in the MMIS2 data.

# **Chapter 2: Autism Waiver Medicaid Expenditures and Service Utilization**

**Figure 10. Medicaid Expenditures\* for Autism Waiver Participants, by Expenditure Category**

Expenditure Category	FY 08	FY 09	FY 10	FY 11
Waiver Expenditures	\$25,643,512	\$29,316,772	\$29,726,290	\$30,380,879
Non-Waiver Expenditures	\$10,930,894	\$11,602,664	\$11,536,480	\$11,571,601
<b>Total Expenditures</b>	<b>\$36,574,406</b>	<b>\$40,919,435</b>	<b>\$41,262,770</b>	<b>\$41,952,480</b>

Total Medicaid expenditures for Autism Waiver participants increased slightly (2%) from approximately \$41.3 million in FY 2010 to approximately \$42.0 million in FY 2011.

**Figure 11. Medicaid Expenditures\* for Autism Waiver Participants, by Expenditure Category, FY 2011**

**Total Expenditures=\$41,952,480**

In each of the four reporting periods, expenditures for waiver services made up between 70 and 72% of the total Medicaid expenditures for Autism Waiver participants.

\* Does not include administrative costs.

Source: DSS

**Figure 12. Average Annual Medicaid Expenditures per Person for Autism Waiver Participants**

Average per person annual Medical expenditures for Autism Waiver participants increased 1.3% (or \$612) from \$45,950 in FY 2010 to \$46,562 in FY 2011.

**Figure 13. Use of Adult Life Planning Services by Autism Waiver Participants**

Adult Life Planning					
FY 10			FY 11		
Users	Expenditures	Expenditures Per User	Users	Expenditures	Expenditures Per User
13	\$5,636	\$434	17	\$5,636	\$332

Adult life planning services were added to the Autism Waiver in January 2010. This service supports Autism Waiver participants aged 18 to 21 years as they transition from school-based services to the adult service delivery system. In FY 2011, 17 Autism Waiver participants utilized this service, at a total cost of \$5,636 and an average annual cost of \$332.

\*Does not include administrative costs.

16 to 21	20	\$22,298	\$1,115	22	\$23,915	\$1,087	23	\$25,513	\$1,109	17	\$17,058	\$1,003
<b>All Users</b>	<b>79</b>	<b>\$87,828</b>	<b>\$1,112</b>	<b>75</b>	<b>\$75,955</b>	<b>\$1,013</b>	<b>75</b>	<b>\$75,374</b>	<b>\$1,005</b>	<b>66</b>	<b>\$64,217</b>	<b>\$973</b>

Medicaid expenditures for environmental accessibility adaptation services totaled \$64,217 in FY 2011, a 15% decrease from the previous fiscal year. The number of service users decreased 12% from FY 2010 to FY 2011.

On average, FY 2011 per person expenditures for this service were \$973, with the 6 to 10 year-old age group having the highest per person cost at \$1,013.

**Figure 15. Use of Family Training Services by Autism Waiver Participants, by Age Group**

Intensive individual support services were widely used by Autism Waiver participants, with the number of users increasing in each of the four reporting years.

In FY 2011, 850 (94%) of the 900 waiver participants utilized this service, at a cost of \$18.8 million. On average, FY 2011 per person expenditures for this service were \$22,084.

**Figure 17. Use of Intensive Residential Habilitation Services by Autism Waiver Participants, by Age Group**

Intensive Residential Habilitation												
	FY 08			FY 09			FY 10			FY 11

The number of Autism Waiver participants receiving intensive residential habilitation services remained the same from FY 2010 to FY 2011.

In FY 2011, expenditures for this service were approximately \$3.6 million. On average, Medicaid paid \$115,370 per person for users of this service.

\*Medications received from a source other than a pharmacy (i.e., inpatient hospitalization, clinic).

\*\*“MCO (managed care organization) capitation payments” are fixed monthly amounts paid to MCOs to provide services to enrolled Medicaid participants. Capitation payments are based on actuarial projections of medical utilization. MCOs are required to provide all covered, medically necessary Medicaid services within that capitated amount.

+“Other” includes Medicaid non-waiver services other than those listed above and those provided under the waiver that are paid by Medicaid on behalf of Medicaid waiver participants.

Source: DSS

Medicaid non-waiver expenditures for Autism Waiver participants increased in each of the reporting years. By FY 2011, non-waiver expenditures totaled \$11.6 million.

The largest payment category for non-waiver services has consistently been the amount paid to MCOs to cover medical services like physician visits, prescription drugs, and hospital stays.

Apart from capitation payments, the largest non-waiver expenditure categories are medicine from somewhere other than a pharmacy, and individualized education plan/individualized family service plan (IEP/IFSP) school health-related services. There was also a notable increase in expenditures for dental services for Autism Waiver participants in FY 2011 .

**Figure 22. Medicaid Waiver Service Coordination Expenditures for Autism Waiver Participants**

Medicaid expenditures for on-going waiver coordination consistently accounted for nearly 85% of waiver coordination expenditures.
