

HOW TO CREATE OR REACTIVATE MA NUMBERS FROM ANOTHER STATE IN WHICH A PROVIDER IS LICENSED

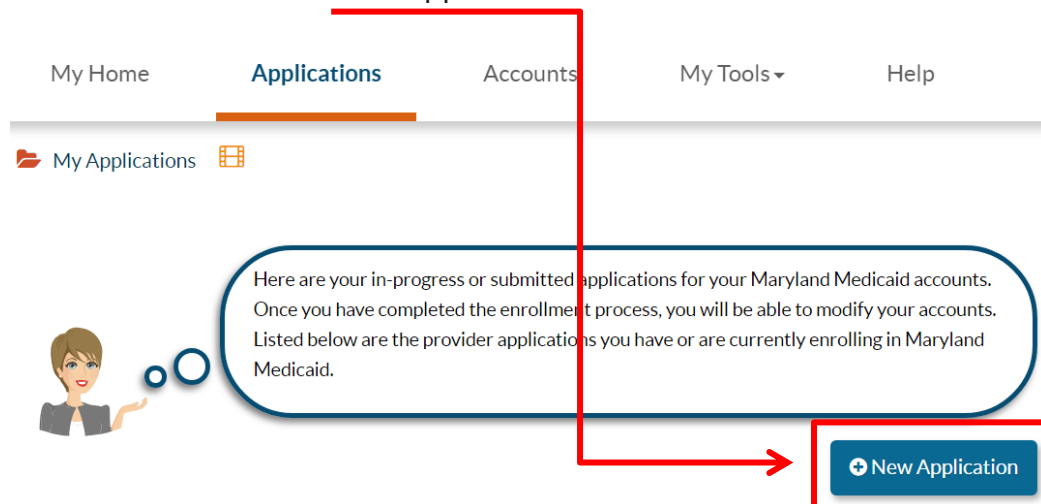

These instructions are for rendering Medicaid Providers enrolling in ePREP who have an active MA number, or a previously-enrolled MA number under a different state license number. To reactivate or create a MA record for your second state license number, you must create a second renderer account in ePREP. If you do not have an ePREP account please first see the "Getting Started" Instructions at: health.maryland.gov/ePREP.

STEP 1: Begin the application process by logging into your existing Business Profile that you set up with your NPI.

STEP 2: From the ePREP Landing Page, select the Applications tab

Then select the "+ New Application" button

STEP 3: Select "I'm new to Maryland Medicaid, and I want to create a new application." Make this selection even though you already have an MA number. This will not impact your existing MA account.

STEP 4: Select "I'm an individual health care practitioner" and hit continue
