Documentation of Referral for Services

When a suspected problem is identified during the child’s health care examination, the Primary Care Provider (PCP) may elect to treat the condition if it is within his/her scope of training and expertise. However, if the condition is outside the expertise of the PCP, he/she must complete a referral to a qualified specialist to evaluate, diagnose, and/or treat the condition. When making the referral to the specialist for expanded EPSDT services,
include complete name, degree, and nine-digit MA number of the PCP. Use the *Maryland Uniform Consultation Referral Form* (Refer to Section 5, Addendum) as required by regulation to facilitate referrals to specialty providers. Document the referral and include the follow-up summary report from the specialist in the child’s medical record.
