If you want to go home, there may be a way!

I wish I could get the help I need in my own home...

Get long term services and supports in the community!

If Medical Assistance pays for any part of your nursing home care, you may be able to get care and services in your own community home instead of in a nursing home.

In the last few years, hundreds of people have moved out of nursing homes to receive services in the community. There are several programs that provide services in the community. We can help you decide which one may be right for you and help you apply. Just let us know.

If you would like to learn more about services that may help you move back to the community, ask a social worker at your nursing home, or contact one of the places listed on the back of this page.
This document is produced by the Maryland Department of Health and Mental Hygiene. By law, nursing homes must give this information to every nursing home resident who indicates a preference to return to the community.
