

MARYLAND MEDICAID PHARMACY PROGRAM

No. 164
May 3, 2016

ADVISORY

In an effort to give timely notice to the pharmacy community concerning important pharmacy topics, the Department of Health and Mental Hygiene's (DHMH) Maryland Medicaid Pharmacy Program (MMPP) has developed the Maryland Medicaid Pharmacy Program Advisory. To expedite information timely to the pharmacy and prescriber communities, an email network has been established which incorporates the email lists of the Maryland Pharmacists Association, EPIC, CARE, Long Term Care Consultants, headquarters of all chain drugstores and prescriber associations and organizations. It is our hope that the information is disseminated to all interested parties. If you have not received this email through any of the previously noted parties or via DHMH, please contact the MMPP representative at 410-767-1455.

Gleevac® (Brand) tablets Is to Be Dispensed Over Its Generic

In some instances the multisource brand name drug is required over its generic equivalents, because the branded drug is less costly than its generic counterpart. This happens most often in cases of newly released generics. When manufacturer rebates are taken into consideration, the brand name drug has a lower net cost to the State.

Effective Monday, May 16, 2016, MMPP will cover **brand Gleevac® tablets** over its generic counterpart (imatinib mesylate). Claims for Gleevac® tablets must be submitted with **DAW 6** and will be priced appropriately. Claims for Gleevac with any other DAW code will reject. A DHMH Medwatch form will not be required.

If any problems are encountered during the on-line claim adjudication, contact Xerox 24-hour Help Desk at 800-932-3918 for additional system overrides related to the use of the correct DAW code (for example, if there is other primary insurance). All Advisories are available online on DHMH's web link at:
